June 10, 2024

Notification of paper revision requirements and final acceptance notification

July 8, 2024

Revised paper submission deadline

July 22, 2024

Final acceptance notification

August 5, 2024

Final Camera-Ready paper submission & copyright deadline

October 13-16, 2024
Conference Dates

CONFERENCE THEME: EMBRACING THE CHALLENGES AND TRANSFORMING ENGINEERING AND COMPUTING EDUCATION IN A TECHNOLOGY-ENHANCED WORLD

We encourage authors to consider the FIE 2024 theme for submissions.

The conference features peer-reviewed papers (Work-in-progress and Full papers), special sessions, pre-conference workshops, and panels across all engineering and computing education disciplines.

The main tracks (along with some examples) as well as submission instructions for the FIE 2024 conference are listed on the conference website at 2024.fie-conference.org.

FIE welcomes Full Papers up to eight-pages and Work-in-Progress Papers up to four-pages. The work-in-progress and full papers can be categorized into the following categories:

1. **Innovative practice**
2. **Research to practice**
3. **Research**

Work-in-progress papers are typically in frontier areas where it is understood the work is in an early or intermediate stage and authors are seeking feedback from the community. Further, FIE welcomes proposals for panels, workshops, and special sessions in order to disseminate scholarly efforts in non-traditional ways.

Abstract submission deadline: March 4, 2024.

FIE 2024 is scheduled as an in-person meeting on October 13-16, 2024. For each accepted paper, one author must register and participate in the conference.
